A worthy addition to the Haynes Great Cars Series, this book chronicles the history of the legendary Mini, from humble beginnings as the brainchild of Alec Issigonis, through 41 years of production, to its rightful status as a British motoring icon. The author also devotes space to the Mini's success in motor sport, where it proved to be a formidable performer. Detailed, authoritative and highly illustrated throughout, this is the essential guide to the Mini's evolution from ubiquitous saloon, through practical, utility and upmarket variants, to the feisty Coopers. The Porsche 911 is arguably the most instantly recognizable sports car in the world, and has become an icon. Since its introduction more than 40 years ago, in 1963, the 911 has been constantly refined and updated to maintain its position at the forefront of the supercar league. Despite its awe-inspiring performance, the use of advanced engineering and leading-edge technology has ensured that Porsche's core model is undoubtedly one of the most usable and durable high-performance cars available. This beautifully produced edition will appeal to all sports car fans as well as to Porsche 911 owners and enthusiasts. This fascinating book features 100 of the classic trademark cutaway drawings that have appeared on the front covers of Haynes car manuals over the years. Each cutaway is presented across a double-page spread with accompanying text and specifications about the car in question. The book is lavishly produced and will make the perfect gift for any nostalgic car enthusiast. Cars covered present a complete cross-section of the industry from the 1950s to the 1980s, including sports cars such as the Porsche 911 and Jaguar E-type and sedans such as the Ford Cortina and Mini. This is one in a series of manuals for car or motorcycle owners. While Elwood Haynes and the Apperson brothers are not as well known as Henry Ford, Ransom Olds and other famous automobile manufacturers, their contributions to the automotive industry are just as significant. They were responsible for one of the first functioning automobiles, if not the first, in the United States. After building their automobile in 1894, the three men formed the Haynes-Apperson Automobile Company in Kokomo, Indiana, one of the first car manufacturing companies in the country. Three years after incorporation, a dispute over money caused the partnership to split up and Edgar and Elmer Apperson formed their own company. Both companies lasted until the mid-1920s. This book is a history of these automotive pioneers and their companies: the Haynes-Apperson Automobile Company, the Haynes Automobile Company, and the Apperson Brothers Automobile Company. It is richly illustrated with photographs of the factories, automobiles, personalities and advertisements. The Ferrari 512 marked the company's return to the World Sports Car Championship, and despite being a late

entrant, the 512 was a formidable race car. Such was Ferrari's breadth and depth in motorsport that they were able to mix and match components relatively quickly and the new car was revealed at the 1969 Turin Motor Show although it was only ready to race the following year. Mauro Forghieri, under whose direction the 512 was developed, used a semi-monocoque chassis similar to that of the 612 P Can-Am car, and the car was fitted with a 5-litre V12 engine. The extremely handsome, muscular body was designed by Pininfarina and was available in both sports coupe and spyder format.
