PUBLISHER: TEKTIME Apple continues its commitment to bringing cheap tablets to market, but with more than enough features for the majority. It is precisely this far-reaching approach to the audience and its price tag that makes the eighth generation iPad a candidate for top sales worldwide. Naming Apple products can be confusing at times, especially if you are unfamiliar with it. Although some products like the iPhone, add numbers to their name with each version. This is not the case with the iPad. To distinguish it from previous and future generations, it can be called iPad 8, iPad 8th generation, iPad 2020, student iPad 8 or 2020. The latter is because it is aimed heavily at children or the university audience. Much has happened since the day in January 2010 when legendary Steve Jobs launched the world's first iPad. Back then, it was an almost revolutionary device, if not as much as the iPhone. The design has hardly changed in recent years. It consists of an aluminum or steel case with rounded corners and a front part in which the frames and the home button were always present (with the exception of the latest iPad Pro and iPad Air).
