Career-Minded Oct 22 2022

Being Career-Minded isn't just about looking for that next promotion. It is about the balance between life and career, the choices we make,

and the attitudes that we harbor inside. It isn't enough to just go to work to collect a paycheck. Our hearts must be engaged in the work that we do in order for us to be successful. In my book, "Career-Minded" I talk about my career path, the good and the bad choices that I'd made. It explains how I discovered who I am and how I found the strength to reach for my dream career and do what I love. I share tips and tools to become successful on and off the job and to influence yourself and others to get real results. Check-out my Facebook page:

www.facebook.com/B.CareerMinded/This page is dedicated to

the thoughts and ideals that help us to reach within to find the super star in each of us. It is a place for sharing insights and experiences that provide guidance and inspiration to do the things that we really love instead of just doing what we're told. In doing so, you can make a difference at work and at home. And even more importantly, you can find joy. Are you just starting out in your career? Have you been employed in a meaningless job? Are you tired of being denied that promotion that you've been working toward? Are you looking for that next big thing to propel your career forward? I'm going to show you through my years of experience how to

find joy in life with any employment of your choosing. You're going to learn how I did it, the what not's, and the how's, with real life examples to make your career successful. Anybody can be happy doing what they love by applying the tools that I'm about to share with you. While this book is mainly focused on career development, it more generally details tools for discovering who you are and what things you like so that you can attain self-fulfillment. It is a practical guide, teaching the reader how to practice reflection and self-understanding, how to create goals, create beneficial networks, and write power statements (to create a more

confident reality). It discusses the law of reciprocity, creating your environment by what you put into it. And you'll find some crossover examples of how these tools work with just about any desire that you might have. It is not enough to look around and see other people happy in their careers. You want to love your job too. So don't wait any longer to take control of your life and future. Join me on a journey as I share my experiences and learnings. used in different professional careers, from fiction and journalism to education and medicine. It draws attention to the fact that a career is a particular kind of artefact with distinctive properties and features that can be analysed and compared, and puts forward a new theory of the relationship between narrative methodology and the vocation of writing. Career construction theory emerged in the late twentieth century, when changes to the patterns of our working lives caused large numbers of people to seek new forms of vocational guidance to navigate those changes. It employs a narrative paradigm in which periods of uncertainty

are treated as experiences akin to 'writer's block', experiences which can be overcome first by imagining new character arcs, then by narrating them and finally by performing them. By encouraging clients to see their careers as stories of which they are both the metaphorical authors and the main protagonists, career construction counsellors enable them to envisage the next chapter in those stories. But despite the authorial metaphor, career construction theory has not been widely applied to analysis of professional careers in writing. The chapters in this volume remedy that gap and in various ways apply the insights of career construction theory to

analyse the relationship between writing and professional life in diverse careers where writing is used. The chapters in this book were originally published in the journal Life Writing.
