From the bestselling author of Blink and The Tipping Point, Malcolm Gladwell's Outliers: The Story of Success overturns conventional wisdom about genius to show us what makes an ordinary person an extreme overachiever. Why do some people achieve so much more than others? Can they lie so far out of the ordinary? In this provocative and inspiring book, Malcolm Gladwell looks at everyone from rock stars to professional athletes, software billionaires to scientific geniuses, to show that the story of success is far more surprising, and far more fascinating, than we could ever have imagined. He reveals that it's as much about where we're from and what we do, as who we are - and that no one, not even a genius, ever makes it alone. Outliers will change the way you think about your own life story, and about what makes us all unique. 'Gladwell is not only a brilliant storyteller; he can see what those stories tell us, the lessons they contain' Guardian 'Malcolm Gladwell is a global phenomenon ... he has a genius for making everything he writes seem like an impossible adventure' Observer 'He is the best kind of writer - the kind who makes you feel like you're a genius, rather than he's a genius' The Times Looking for something to engage your children this summer? During the summer months, students who make progress during the school year often lose valuable information. This regression is known as "the summer slide" (Borman, Benson & Overmann, 2005). The biggest discrepancy is between students of low SES and students of high SES. Students from low income families may not have the resources, access to literature, and same opportunities during the summer months. While their financially more well off peers may be making academic gains over the summer months, the lowest income students have shown to regress the most during this time off from school. Educators and administration are asking what can be done, but unfortunately the answer is usually hindered by the cost. Some school systems offer summer learning programs to their students, but many cannot afford to do this. For school systems that cannot afford instructional summer programs at school, one thought is to make a summer packet of educational activities to be sent home for the summer months. Parents can be informed and educated of the importance of continued learning over the summer months. The hope is that even with

a minimal amount of continued learning over the summer months, the amount of regression will decline. The top grades The best clothes A great body A cute boyfriend But they may also have... Exhaustion Anxiety Eating disorders Crippling insecurity From grammar school girls to working women, the pressure to be perfect is spreading like a disease. These Supergirls feel the unrelenting need to succeed -- sometimes at the cost of their own happiness and sanity. A recovering Supergirl herself, Liz Funk exposes the dangerous consequences that can come from striving for perfection. By closely following five girls and interviewing nearly one hundred more, she takes us inside the Supergirl psyche, explaining the causes of this phenomenon and showing how Supergirls can let their (sleek and shiny) hair down and find some time to relax and enjoy life! With practical advice, biting humor, and the sensitivity of someone who's been through it all, Funk's Supergirls Speak Out is the absolutely necessary companion for any girl who thinks 100 percent just isn't enough.
